SUMMARY

Motivated and detail-oriented B.Tech student specializing in Artificial Intelligence and Data Science with strong knowledge of Python, Machine Learning, Data Science, and Software Development. Hands-on experience through internships and academic projects involving Computer Vision, Predictive Analytics, and Database Management. Seeking internship or entry-level opportunities to contribute technical expertise while expanding professional skills.

EDUCATION

Adithya Institute of Technology (Autonomous), Coimbatore <i>B.Tech – Artificial Intelligence and Data Science, CGPA: 9.5/10 (95%)</i>	<i>Pursuing</i>
Glazebrooke Public School, Salem <i>Higher Secondary Certificate (HSC), Percentage: 84.4%</i>	2024
Glazebrooke Public School, Salem <i>Secondary School Leaving Certificate (SSLC), Percentage: 88.6%</i>	2022

EXPERIENCE

Software Engineering Intern <i>CORIZO Tech Solutions</i>	Nov 2024 – Jan 2025 Aug 2024 – Oct 2024
- Assisted in software development and testing using Python. - Debugged application code and documented technical fixes. - Collaborated with development teams on project modules. - Participated in Software Development Life Cycle (SDLC) activities.	
Python Developer Intern <i>Glow Logics Solutions</i>	
- Developed applications using Python and MySQL. - Designed and implemented database structures. - Contributed to testing, debugging, and deployment activities. - Strengthened problem-solving and teamwork capabilities.	

PROJECTS

Face Recognition Attendance System Technologies: Python, OpenCV, Face Recognition, NumPy
- Developed a real-time attendance tracking system using facial recognition. - Implemented image processing and face encoding for accurate identification. - Automated attendance management, reducing manual effort and errors. - Applied computer vision techniques using OpenCV.

- GitHub: <https://github.com/akshayalekshmi23-sudo/FaceRecognition.git>

Student Performance Prediction System | Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib

- Built a machine learning model to predict student academic performance.
- Performed data preprocessing, visualization, and feature engineering.
- Applied predictive analytics using Scikit-learn.
- Generated meaningful insights from educational datasets.
- GitHub: <https://github.com/akshayalekshmi23-sudo/students-performance.git>

Online Tutoring System | Technologies: Python, MySQL

- Developed an online platform for managing students and learning resources.
- Integrated MySQL databases for efficient data management.
- Implemented tutor-student interaction functionalities.
- Improved accessibility to educational resources.
- GitHub: <https://github.com/akshayalekshmi23-sudo/online-tutor.git>

TECHNICAL SKILLS

Python

Java

C

C++

JavaScript

HTML5

CSS3

MySQL

NumPy

Pandas

OpenCV

Scikit-learn

Matplotlib

Git

GitHub

Visual Studio Code

Jupyter Notebook

Artificial Intelligence

Machine Learning

Data Science

Computer Vision

Software Development

Data Analysis

Communication

Teamwork

Leadership

Problem Solving

Time Management

Adaptability

CERTIFICATIONS

NPTEL Certification – Python for Data Science

Hindi Praveen Examination – Dakshina Bharat Hindi Prachar Sabha (2019) Hindi

Certificate Examination – Central Hindi Directorate (2019)

ACHIEVEMENTS

- Best Student Award – HSC - Best Student Award – SSLC - Qualified JEE Main (AIR 36,000) - Participated in AEEE Examination - Active participant in technical and academic events

LANGUAGES

- English (Read, Write, Speak) - Tamil (Read, Write, Speak) - Hindi (Read, Write)
